

RESOURCES TECHNICIAN

(FISHERIES/FORESTRY)

Required for a one year term with The Nuchatlaht Tribe. The primary role is with the development, supervision & management of our fisheries and with the management of other resource such as forestry &/or environmental management.

Qualifications: Background in planning, development & management of resources. A sound knowledge of the fisheries industry, and an understanding of aquaculture protection is required. A "Fisheries Technician" certificate is preferred, but a background in the management of fisheries/forestry industries will be considered. A valid Class 5 Drivers License is required.

Duties: Prepare proposals /reports, and will liaison with the various organizations. A knowledge of legislative or regulatory acts such as "Work Safe BC" (OH&S), Fisheries Act, Navigable Waters Act, Marine Safety, Water Protection Act; and how they impact First Nations is required.

Responsible for all fisheries equipment and activities, therefore, a background with the operation & maintenance of small boats & commercial fishing vessels.

Planning and seasonal supervision of fisheries staff, required.
