

# Part-Time Pediatric Nurse (nights only)

We are seeking a part-time nurse to work with our special needs daughter. She has lots of energy and a great personality, and has medical conditions that require special assistance.

The position would cover 2-3 shifts per week, typically weekends (nights only). Flexibility would be an asset. Nurse must stay awake during the night, but there is the opportunity to work on other pursuits while monitoring our daughter's medical needs (read, watch TV, etc.).

## Position Details

- Part-time positions (avg. 18-27+ hours/week), ongoing
- Open to **RN's**, **LPN's** and **nursing students**
- Shifts are nights only (2-3 shifts/week)
- Starting **ASAP**

**Location:** Courtenay

**Salary:** Consistent with industry standards (depending on qualifications)

**Will train successful applicant in required skills**

**Posting Expires:** Open until filled

## Job Description

The successful candidate will be responsible for night care for a 7-year old with complex medical condition (tracheostomy, occasional night time ventilation, g/j-tube, non-verbal, limited mobility).

## Roles and Responsibilities

- Tracheostomy care, including ventilation management
- G/J-tube feed administration and care
- Medication administration, equipment care and maintenance
- Managing and minimizing night-time wakings

## Required Skills

- Experience with, and the ability to 'read' and respond to a child's needs
- A strong sense of self confidence and ability to take initiative
- Detail oriented
- A calm, collected, reassuring demeanor in emergency situations
- Ability to move rapidly in emergency situations
- Ability to make rapid, sound decisions under pressure
- Comfortable with technology
- Ability to identify trends in behavior and medical needs

**Please send resume and cover letter via E-mail, attention: Shayne and Erin Boelk**
